Education

Southern Alberta Institute of Technology (SAIT)

Calgary, AB

Diploma, Software Development. GPA: 3.8

2024 – 2026

Relevant Coursework: Object-Oriented Programming, Web Development, Mobile Application Development, Database, Cloud Computing, Software Analysis, Software Security, Software Testing and Deployment

Certifications: Schulich Ignite (UCalgary, 2022), Git Essential Training (2024), Learning Git & GitHub (2024)

Experience

Frontier Industries

London, England, UK (Remote)

Web Designer/Developer Apprentice

Apr 2026 – Jul 2026 (3-month contract)

- Conducted a structured audit of the existing site in the first month and documented findings, followed by functional testing of rebuilt pages to ensure quality and consistency
- Rapidly learned Framer and TypeScript to meet project requirements, writing custom code components within Framer's development environment
- Planned and built a full redesign of the company website from scratch using Framer, applying independent design decisions while aligning with the existing brand structure

Projects

HomeFull Website – <https://github.com/Haedyn06/Project-HomeFull.git>

- Collaborated in a team of three to design and develop a full-stack web application connecting homeless individuals with job opportunities, deployed publicly using Vercel (live at <https://project-homefull.vercel.app/>)
- Developed search and filtering features by city, skill, and shelter, improving user navigation and accessibility of job listings

Village Rental – <https://github.com/ZaRiceHatGuy/VillageRental.git>

- Designed and developed a full-stack desktop application using Python and PostgreSQL, supporting CRUD operations across a 5-table relational database.
- Implemented real-time rental cost calculations and interactive reporting dashboard, enabling efficient tracking of sales by date, customer, and equipment category.

Quadratic Solver – <https://github.com/ZaRiceHatGuy/Quadratic-Calculator.git>

- Developed an interactive GUI application for solving quadratic equations with real-time graphing, supporting linear, quadratic, and complex root cases
- Handled all equation cases (linear, quadratic, real/complex roots) and vertex calculation with adjustable x-axis range

Leadership & Activities

Centennial High School Band

Calgary, AB

Section Leader

Sep 2023 – Jun 2024

- Led weekly rehearsals for a percussion section with a total of 11 members and mentored 8 junior members throughout the school year.
- Ensure the group follows the conductor and stays on track with the rest of the band during rehearsals and concert performances.
- Received Team Award for Leadership, Resilience, and Community-Building

Skills & Competencies

Programming Experience: 4+ years (self-directed and academic)

Technical: Python, C#, Java, HTML/CSS, JavaScript, TypeScript, PostgreSQL; React, Next.js, Node.js; Git, Vercel, Framer, Supabase, Linux

Interpersonal: Collaborative teamwork, problem-solving under pressure, technical communication, mentorship & peer feedback, analytical thinking

Language: English (Fluent), Vietnamese (native)
